2012 Range

Welcome to the new look Procter Pest-Stop 2012 brochure

After a few years in a similar format, we decided it was time for a new and brighter design for our trade brochure. So we hope you like it, and in particular the greater space we've given to product images.

As for new product, the real stars are the indoor repellers which you'll find on pages 18 and 19. These products replace the highly successful repellers we've sold for a number of years, with the main visual difference being the sleek slim-line design. The new repellers have many added features, with all being more powerful than those they replace, plus they're more eco-friendly, using less energy, less plastic and less packaging.

At Procter Pest-Stop we've been enjoying increasing success with our export market, and now supply to 17 countries across Europe including Sweden and Germany – both, of course, renowned for exacting standards in all respects. Why this export success? Well we're told that the high quality of our product, crystal clear packaging (we rarely even have to change the language...), combined with superb customer service, all add-up to put us ahead of the competition. And we think that's the same in the UK, so if you aren't already enjoying all the benefits of working with Procter Pest-Stop, then we'd love to welcome you on board.

Conventional Rodent Traps

A range of traditional wooden break-back traps and their modern counterparts.

www.pest-stop.co.uk

1 Little Nipper Mouse Trap PSLNM

Contains 30 individual traps

The unique treadle design of this, the original wooden platform mousetrap, makes it one of the most effective traps available. The Little Nipper was first made by Procter Bros. Ltd. In 1897, and its distinctive design has remained largely unchanged ever since.

- Bait is placed on the treadle, which is raised when the trap is set.
- The mouse has to cross the treadle to reach the bait.
- The slightest motion is enough to trigger the trap, delivering an astoundingly high catch-rate.

2 Little Nipper Rat Trap PSLNR

Contains 6 individual traps

This wooden-based, traditional rat trap is one of the most powerful on the market due to its strong spring. The treadle bait-station is based on the Little Nipper wooden mousetrap design.

- Bait is placed on the treadle, which is raised when the trap is set.
- The rat has to touch the treadle to reach the bait, triggering the trap.
- Full setting instructions included. • Quick and humane.

3 Little Nipper Mouse Trap PSLNMB

Contains 2 individual traps - 12 packs per case
Please see above.

4 Little Nipper Rat Trap PSLNRB

Contains 1 individual trap - 6 packs per case
Please see above.

5 Snap Trap POS PSSTM

Contains 16 individual traps

This plastic mousetrap is pre-baited with a mixture most mice find irresistible, and is extremely safe and easy to set.

- Pre-baited with a mixture of peanut oil and molasses, extremely attractive to mice.
- The Snap Trap sets with a simple click, and can even be set using just one hand.
- No need to touch dead mice; simply release by pressing down on the tab – the trap will then be ready for re-use.

6 Snap Trap PSSTMB

Contains 12 packs per case

- The Snap Trap Boxed contains 1 product.

Conventional Rodent Traps

7 Mousetrap

2

Although looking like a bait station, the box contains a powerful mouse trap which makes it ideal for use where children and pets are present.

- Safe to use around children and pets.
 - No poisons

8 Advanced Mouse Trap

Contains 2 individual tra

One of the most powerful mousetraps available, the Advanced Mousetrap also one of the easiest to use. Once baited, the trap is set by simply clicking the arm up into position. The mouse has to try and enter the bait-station to take the bait, which triggers the trap.

- Plastic and metal construction for easy cleaning.
 - The mouse cannot take the bait without triggering the trap.
 - Simple to set and empty, no need to touch dead mice.
 - Sold as a twin-pack, as it is advised to set more than 1 trap in an infested location to increase catch-rate.
 - Quick and humane.

9 Sure Set Plastic Mouse Trap

**Contains 2 individual traps 6 packs in a display
2 trays per case**

The Procter Pest-Stop Sure-Set Mouse Trap is a conventional back-break trap that is humanely quick, and easy to set. Mice cannot take the bait without triggering the trap, as they need to tread on a platform to reach the bait-wire. Sold as a twin-pack for added value and to increase catch-rate.

- Plastic for easy cleaning.
 - No need to touch dead mice.
 - Easy to bait & set.
 - Twin-pack for extra added value.

10 Easy Setting Metal Mouse Trap PSE

Humane Rodent Traps

Live-capture mouse traps for catching and releasing without harming mice.

www.pest-stop.co.uk

1 Trip Trap PSTT

Contains 6 individual traps per display tray

The safe and friendly way to deal with unwanted house guests. This British-designed product has been especially developed to cause the least stress and no harm to mice when they are caught.

- The door drops automatically behind the mouse when it crosses the treadle to reach the bait.
- Clear plastic body means you can see at a glance when you have caught something.
- Plentiful ventilation points reduce stress to caught mice.
- Easy to bait and set – each trap is provided with full instructions for use.

2 Trip Trap PSTTB

Contains 6 packs per case

Please see above.

3 Multicatch Mouse Trap PSMMT

Contains 6 individual traps per display tray

The Multicatch trap is designed to capture and hold up to 4 mice at the same time, without harming them. A one-way flap entrance resets itself after being triggered, allowing more mice to enter and be caught.

- Tunnel design serves to attract mice to enter the trap.
- Flap resets automatically behind the mouse when it crosses it to reach the bait.
- Removable label reveals a clear plastic lid, which means you can see at a glance when you have caught something.
- Plentiful ventilation points reduce stress to caught mice.
- Easy to bait and set – each trap is provided with full instructions for use.

4 Multicatch Metal Mouse Trap PSPMMT

Contains 12 per case

The Procter Pest-Stop Multi Mouse Trap is a high quality galvanised steel trap designed to catch and hold up to 10 mice at the same time. Multi-catch traps are often used by professional pest control operatives in areas where they cannot use poisons or conventional traps.

- Simple to use.
- There are two entry points for added catchability.
- The clear plastic lid ensures you can see at a glance when you have caught something.
- Extra ventilation points to reduce stress to captured mice.

5 Automatic Metal Mouse Trap PSPAMT

Contains 12 per case

The Procter Pest-Stop Automatic Mouse Trap has a clockwork action, which once set can catch up to 15 mice. Optimum positioning for the trap is alongside walls, where mice tend to travel. When the mice enter they are swept into the capture compartment.

- Easy to use
- No bait or chemicals.
- Reusable.
- Durable.

Rodenticides & Bait Stations

Powerful and fast-acting, Procter Pest-Stop rodenticides are proven to be highly effective in the control of mice and rats.

www.pest-stop.co.uk

1 Mouse/ Rat Killer 3kg PSMRK3000

Contains 3kg of loose wheat-based bait, 4 per case

The Procter Pest-Stop Mouse/Rat Killer 3000 contains 3kg of loose whole-grain bait (0.005% Difenacoum), with a unique aniseed scented attractant mice will love. The pack also includes a measuring scoop and gloves.

- Fast acting.
- Includes gloves and scoop for easy use.
- Unique aniseed attractant.

Mouse/ Rat Killer 1kg PSMRK1000

Contains 1kg of loose wheat-based bait, 6 per case

Please see above.

2 Mouse Killer Sachets PSMK150

Contains 6 per case

The Procter Pest-Stop Mouse Killer Sachet Packs are made from edible waxed-paper easy for mice to eat their way into, and no need to directly handle bait. Each carton contains fifteen 10gram sachets of cut-wheat bait (0.005% Difenacoum), with our unique aniseed scented attractant.

- Unique aniseed attractant.
- Fast acting.
- No need for direct handling.

3 Rat Killer 500g PSRK500

Contains 6 per case

The Procter Pest-Stop Rat Killer flask contains 500 grams of whole-grain bait (0.005% Difenacoum), with our unique aniseed scented attractant.

- Unique aniseed attractant.
- Fast acting.

4 Mouse Bait Station PSMBS

Contains 10 per case

For use with rodenticides, this bait station's triangular design allows it to be used discreetly in corners of rooms and buildings. Highly durable and shock resistant, the unit is completely lockable for child and animal safety. Provides a highly effective method to deal with mouse infestations, and often the chosen solution for pest control professionals.

5 Pre-Baited Mouse Station PSMKSBS

Contains 6 per case

The Procter Pest-Stop Pre-baited Mouse Station is ideal for use in the home or in any location, as it cannot be opened and is therefore safe where there are children or pets. The active ingredient used in this product is the powerful and fast-acting Brodifacoum, contained in a paste bait, highly attractive to mice and easily digested.

- Fast acting.
- Safe to use around children and pets.
- Highly attractive to mice.

Rodenticides & Bait Stations

Powerful and fast-acting, Procter Pest-Stop rodenticides are proven to be highly effective in the control of mice and rats.

www.pest-stop.co.uk
PROCTER
PEST-STOP

6 Rat Bait Station PSRBSP

Contains 6 per case.

Lockable, highly durable, and shock-resistant, our Rat Bait Station is used by professional pest control operatives, and meets the highest standards.

7 Super Mouse & Rat Killer Bait Packs 800g

Procter Pest-Stop Super Mouse & Rat Killer Bait Packs contain a unique aniseed attractant which mice and rats find irresistible.

- New perforated sachets.
- Fast acting.
- Highly effective.

The packs come in two sizes:

8 X 100g PSMRK800

Contains 6 per case

50 X 100g PSMRK5000

Contains 4 per case

8 Super Mouse & Rat Killer Blocks

Procter Pest-Stop Super Mouse & Rat killer blocks contain Bromadiolone which is a highly effective way of killing mice and rats.

- Fast acting.
- Highly Effective.
- Preferred method of many pest control professionals.
- Pack contains gloves for added safety.

The packs of blocks come in three sizes:

2kg PSWB2000

Contains 6 per case

4kg PSWB4000

Contains 4 per case

8kg PSWB8000

This size is for professional use only. Contains 4 per case

9 Super Mouse & Rat Killer Starter Pack PSMRK200

Contains 12 per case

The Procter Pest-Stop Super Mouse & Rat Killer Starter Pack contains 2 x 100g grain sachets of the type used in our Super Mouse & Rat Killer Bait Packs, plus 2 bait trays.

- New perforated sachets.

- Fast acting.

- Highly effective.

10 Double Bait Station PSDBS

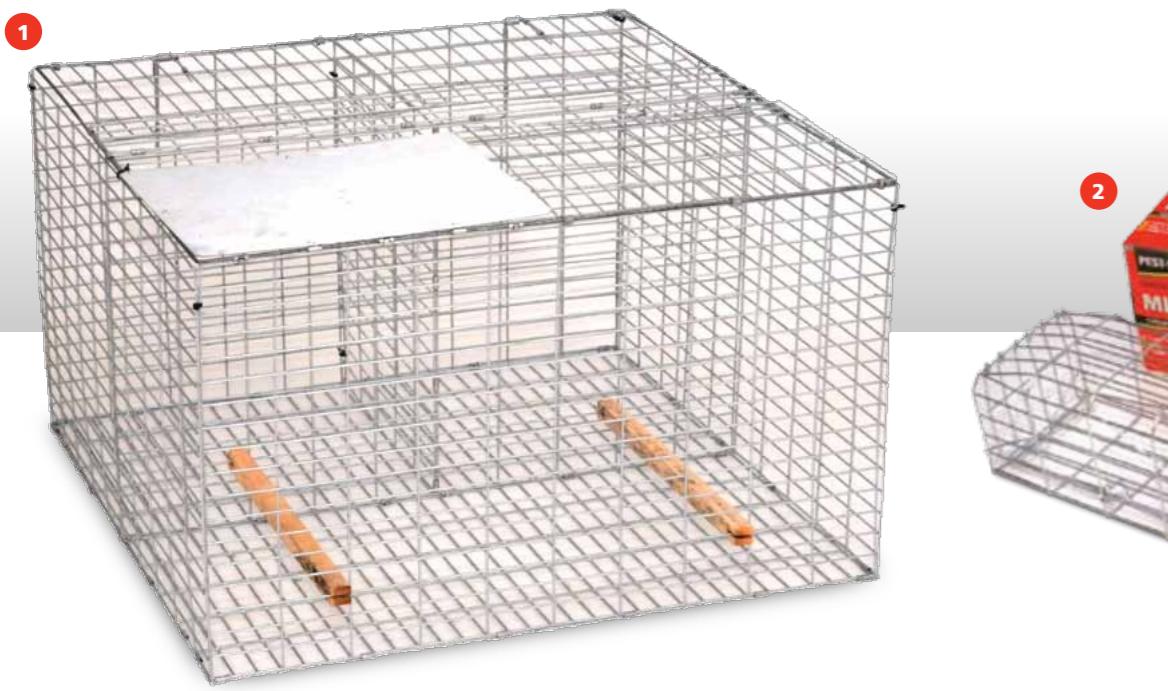

Contains 10 per case.

A High capacity bait station for rodenticides which also allows for easy viewing of how much bait remains in the tubes. Can also be used for block bait and rods are supplied for this.

- Double tubes hold more bait.
- Shows level of bait remaining in tubes.
- Tough waterproof construction.
- Rods included for block bait.

Cage Traps

Tough and durable cages for trapping a wide range of pests in the garden and countryside.

A traditional device for the humane trapping of rats or similar sized pests. A spring-loaded front entrance is triggered when the intruder takes the bait, safely trapping it inside.

- Supplied in full colour box

Product dimensions:
L 37.5cm x W 18.5cm x H 16cm.

8 Multicatch Rat Cage PSMRCAGE

Contains 6 per case

A traditional device for the humane trapping of rats or similar sized pests. The door is closed when the intruder takes the bait, safely trapping it inside.

- Supplied in full colour box

Dimensions when assembled:
L 40cm x H 18cm x D 22cm.

Electronic Pest Control

A range of battery and mains operated products for indoor use to repel or kill mice, rats, squirrels, crawling insects and other similar pests.

1 NEW Procter Pest-Stop Pest Repeller for Large Rooms PSRSL

Contains 12 per case

This is the entry-level ultrasonic repeller from our new slim-line range. It covers an area twice as large as the product it replaces, with an impressive 1000 square feet of coverage. The repeller works by emitting ultrasonic waves which cause auditory stress to rodent and crawling insect pests.

- ECO Friendly – uses less energy, slim design uses less plastic, less packaging too
- Plugs into normal socket so can be used in any room up to 1000 sq. ft.
- Modern slim-line design
- Cannot be heard by humans, dogs, cats, fish or birds
- Highly effective against mice, rats and most crawling insects

2 NEW Procter Pest-Stop Repeller for Whole House PSRW

Contains 12 per case

With a coverage of 2,500 square feet, this new repeller covers a typical house. As well as ultrasonic, the repeller uses electromagnetic waves and is highly effective against rodents and most crawling insects.

- ECO Friendly – uses less energy, slim design uses less plastic, less packaging too
- Unique STOP-START cycle to repel mice
- Also effective against most crawling insects
- NEW PET-SAFE setting so can be used around rodent pets
- NEW frequencies to disrupt mice & rats

3 NEW Procter Pest-Stop Repeller for Larger House PSRSH

Contains 12 per case

As the name suggests, this repeller is for larger houses and covers a truly impressive 4000 square feet. Like the Repeller for Whole House it also uses both ultrasonic and electromagnetic waves, but also has many additional features.

- Covers a massive 4,000 ft² (around 370 m²)
- ECO Friendly – uses less energy, slim design uses less plastic, less packaging too
- Only pest repeller with SPIDER setting
- NEW energy saving setting means it costs only a few pence a month to operate
- NEW pet-safe setting so can be used even around rodent pets
- NEW ultrasound frequency disrupts normal breeding and nesting behaviour of rodents

4 NEW Procter Pest-Stop Three Single Room Pest Repellers PSRSR3

Contains 12 per case

This value pack contains three of the Large Room Repellers.

Electronic Pest Control

A range of battery and mains operated products for indoor use to repel or kill mice, rats, squirrels, crawling insects and other similar pests, and training devices for pets.

5 Electronic Mouse Killer PSEMK

Contains 12 per case

State-of-the-art 'smart' electronics control this unique device. When a mouse enters the electronic mouse killer and negotiates its way towards the bait, it reaches a point where it touches both killing plates and completes an electrical circuit, which kills the mouse virtually instantly.

- Four AA-size batteries (not included) provide enough power for up to 50 kills. Warning light signals when batteries need replacing.
- Built-in safety features ensure that the Mouse Killer does not present a hazard to children or pets. Opening the device switches it off, and the entry-tunnel is designed so no fingers, pens etc. can be inserted.
- A warning light signals when the device has been activated so that the remains can be removed and the trap reset.
- Full instructions for use provided.

6 Bark Trainer (Collar Mounted) PCBark

Contains 12 per case

This battery-operated device uses a high frequency signal to teach your dog not to bark. A sensor detects whenever the dog barks, and the Bark Trainer then emits a series of high sonic whistles.

- The dog will usually learn to associate barking with the unpleasant noise, which should reduce or even eliminate 'nuisance' barking.
- Adjust the unit to react only to your dog's barking.
- Simple to use, and harmless to your pet.
- No harmful chemicals or pesticides.
- Battery-operated (3 x LR44, not included).
- Average battery-life 30-50 days.
- Includes collar.

7 Electronic Rat Killer PSERK

Contains 4 per case

State-of-the-art 'smart' electronics control this unique device. When a rat enters the electronic rat killer to reach the bait, it reaches a point where it touches both killing plates and completes an electrical circuit, which kills it in seconds. Because of the open design to suit rats rather than mice, the rat killer is intended for use by professional pest controllers and agricultural workers.

- Four C-size batteries (not included) provide enough power for up to 12 kills. Warning light signals when batteries need replacing. Also kills mice.
- A warning light signals when the device has been activated so that the remains can be removed and the trap reset.
- Full instructions for use provided.
- Also effective against mice.

8 Electronic Bird Scarer PR3030

Contains 1

This electronic bird scarer uses the hunting calls of a sparrowhawk, falcons and owls to frighten other birds away.

- Tested and proven effective against pigeons, seagulls and smaller birds.
- Can be set to motion-sensitive (PIR) or constant.
- Timer on constant setting can be set from 5 to 30 minutes delay.
- Mains powered.

Ultrasound and Electromagnetic Products

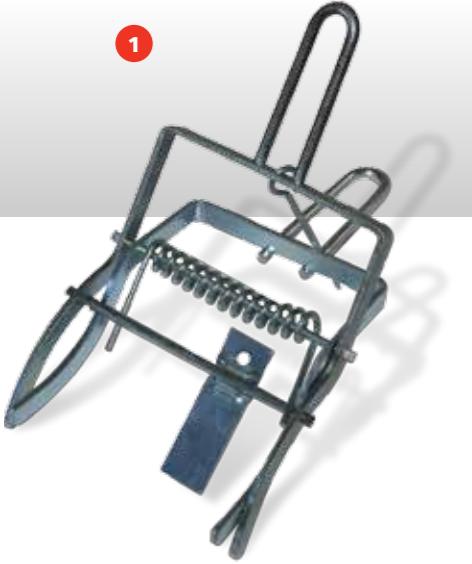

Using the latest Ultrasound and Electromagnetic technologies, Pest-Stop products are technically advanced, powerful, effective, clean and environmentally safe. They provide the ultimate answer to most common pest problems in homes, offices, warehouses, restaurants, gardens and many more indoor and outdoor areas.

Ultrasound and Electromagnetic Products

Garden Pest Control

A wide range of products to deal with most common garden intruders, including high-tech electronic repellers and traditional traps.

www.pest-stop.co.uk

T-STOP

1 Claw Mole

The Claw Mole Trap is designed with a horizontal trigger which is activated by the earth being moved by a mole clearing a run. It is ideal for use against stubborn moles that often just fill other traps with earth.

- Powerful jaws ensuring a humane kill.
 - Can also be used alongside other mole traps.
 - Popular with professional mole trappers.

2 Scissor Mole Trap

A traditional alternative to chemical or toxic solutions. Highly effective, the Scissor Mole Trap benefits from features that make it superior to other similar looking pincer-type devices.

- The trap is easy to set, with long handles that ensure a safe grip while the loose plate is positioned in the centre of the clasp.
 - After the trap has been set in the mole run, the extra-powerful spring closes the trap on the mole when it dislodges the loose plate.
 - From above ground, the open handles make it obvious that there is a dead mole to be removed.
 - Manufactured from long-lasting plated steel.
 - Each trap comes complete with instructions to help the user set the trap correctly for maximum success.
 - As used by professional mole trappers.

3 Tunnel Mole Tra

Also known as a 'barrel' mole trap, this is a very traditional solution to a common garden problem. The trap is set, then placed in the mole run, and triggered when the mole passes through it, killing it instantly.

- Manufactured from galvanized steel to prevent corrosion.
 - Dual setting means the trap is triggered whichever direction the mole enters from.
 - As used by professional mole trappers. • No chemicals.

4 Solar Mole Repeller P%

This advanced product uses solar energy to power its sonic repeller. The sonic repeller drives moles and other burrowing animals away by emitting low frequency ground vibrations every 15 to 20 seconds, which the animal interpret as signs of an approaching predator. Coverage is up to 7500sq ft.

- Advanced product which is solar powered.
 - Sonic device drives moles and other burrowing animals away.
 - Coverage is up to 7500sq ft.
 - No batteries required.

5 Mole Re

An advanced sonic repeller that drives burrowing animals away by emitting low frequency ground vibrations, which creatures such as moles interpret as signs of an approaching intruder.

- The unit emits a low frequency vibration every 15 to 20 seconds, which is transmitted through the soil. The effectiveness of the mole repeller can be affected by soil density; chalky or sandy soil will not transmit the vibrations as effectively as solid clay-type soil.
 - Covers up to 9000 sq.ft. (about 836 sq. metres).
 - Battery operated (4 x D cell batteries). Batteries normally last for around 4 months. Safe and economical to run.
 - Environmentally friendly – no chemicals or traps.
 - Will not affect humans, cats, dogs, fish or birds.

Garden Pest Control

A wide range of products to deal with most common garden intruders, including high-tech electronic repellers and traditional traps.

OCTER
EST-STOP SERIOUS ABOUT PEST CONTROL

p24

www.pest-stop.co.uk

6 Prikka-Strip (8 x 500mr)

1

Keeps intruders and cats out of property. The purpose of the strips is to keep cats and intruders out of property but without harming either – so it's very much a case of 'maximum discomfort but minimum harm' when either a cat's paw or intruder's hand makes contact with the spikes.

- Made from a tough plastic
 - Can be fitted to the tops of fences, gates, walls, pipes, or ledges on buildings
 - Each strip is 50cm long and 4.5cm wide
 - Strips can be cut to size and also divided up their centre to create two thinner strips

7 Professional Bird Spikes (10 x 500mm) PSPBS1

Supplied in convenient 50cm strips which can be cut to the desired length, these Bird Spikes can be easily fixed to guttering, sills or walls to prevent birds from landing. A proven method of keeping buildings free from birds all types.

- Tough steel spikes on a plastic base.
 - Easy to cut to required size.
 - Can be fixed into place with screws or glue (no

8 Outdoor Pest Repellent

The Procter Pest-Stop Outdoor Pest Repeller is a powerful ultrasonic repeller designed to clear the garden of unwanted visitors. The motion detector detects movement up to 70ft from the unit, which triggers a burst of powerful ultrasound harmlessly scaring the intruders away. The mains adapter is for use with the outdoor pest repeller, allowing it to run off the mains.

- 3 position settings letting you target small, medium or larger sized intruders.
 - Battery operated (4 D cell batteries), with option to run off a 12v AC/DC adaptor (sold separately). Batteries normally last 3 months when using m/s setting.
 - A passive infra red (PIR) sensor detects movement in an arc. Max 70 x 50ft.
 - Includes wall/fence brackets also an adaptor for using on a rod/pole, allowing total flexibility of location for maximum effectiveness.
 - Test button triggers an audible signal.
 - Safe and effective – no chemicals or traps.
 - Will not affect people, fish or birds.

AC/DC Ad

1

9 Ultrasonic Cat Scarer

This device uses a PIR motion sensor to detect movement to a distance of 40ft, it emits a powerful ultrasonic whistle which scares cats away.

- Pre-set frequencies deter cats.
 - Battery operated (2 x 9v), batteries not included
 - Option to run off mains (adaptor sold separately)

Garden Pest Control

A wide range of products to deal with most common garden intruders, including high-tech electronic repellers and traditional traps.

www.pest-stop.co.uk

10 Hayahart Spray-Aw

1

PSimple to install in flower borders, lawns or adjacent to garden ponds, the Spray Away is an environmentally-friendly solution to the problem of garden pests. Effective against most garden pests, including: Herons, cats, dogs, foxes, rabbits, squirrels, badgers and deer.

- Virtually maintenance free, the Spray Away operates from a 9-volt battery and mains water supply, connected via a garden hose.
 - Passive infrared (PIR) motion detector senses the presence of pests up to 10m (35 feet) away.
 - The device responds by directing a three-second jet of water up to 10m (35 feet) over a maximum arc of 300 degrees; the sudden motion and water are effective scaring away garden pests.

11 Bird Scarer Rods 3 in Polybag & Header PSBS

1

Simple yet affective, Bird Scarer Rods work by rotating in the wind and ideal for both gardens and allotments. In addition to deterring unwanted birds, the rods are also an attractive decorative feature.

- Deters unwanted birds from gardens and
 - Attractive appearance.

12 Biofume Mole Smokes

1

The Biofume mole smoke contains food grade castor oil obtained from the castor plant. The smoke coats the soil inside the hole with a thin layer of castor oil; which acts as a barrier between the mole and its food – causing mole to move on to find a new food source.

- Deters unwanted moles from gardens and allotments
 - Use 1 mole smoke for every 3 molehills.
 - Easy to use – light the fuse and insert into molehill
 - Environmentally friendly – no chemicals or toxins

13 Cat Repeller Rods (Pack of 4)

1

These plastic rods emit a strong scent, which is designed to stop cats fouling the surrounding area. The sharp citrus smell is impregnated within the plastic during the moulding process, which means that, no matter what the weather, Procter Pest-Stop Cat Repeller Rods keep working for up to 10 weeks.

- Each rod protects approx. 1 metre square.
 - Unaffected by the weather, will last for up to 10 weeks.
 - Discreet design and colouring blends easily into flower beds.
 - No harmful chemicals or pesticides.
 - Easy to use in the garden or for house plants

Insect Pest Control

High-tech electronic and traditional insect killers and traps.

① Fumite Insect Killer (Permethrin Smoke Generator)

3.5g size PSIK

24 per display tray, 6 displays per case

A small canister which, when lit, dispenses a smoke which kills insects in the area it is used in.

- Ready to-use – does not require mixing or application equipment
- Smoke is non-tainting and leaves no residual odour
- For thorough treatment of houses and storage areas etc
- Treat inaccessible areas – roofs, nooks and crannies, inside machinery

Area treated depends on infestation:

- Flying insects – 1 smoke generator treats 120 m³
- Fleas / Bed bugs – 1 smoke generator treats 30 m³
- Ants / Cockroaches – 1 smoke generator treats 7.50 m³

30g size PSPIK

Contains 12 per display tray

This product works in the same way as above, but treats a larger area:

- Flying insects – 1 smoke generator treats 1000 m³
- Fleas / Bed bugs – 1 smoke generator treats 250 m³
- Ants / Cockroaches – 1 smoke generator treats 62.50 m³

For professional pest control use only

② Window Fly Stickers PSWFS

Contains 4 individual stickers, 20 per case

These fly stickers exploit the attraction flies have to windows and light. They have an attractive and decorative floral design and can be placed discreetly on windows in a variety of locations to capture nuisance flies.

- The trap is effective for up to 3 months, after which it can be simply removed without leaving any mess.

③ Clothes Moth Trap PSCMT

Contains 2 individual traps, 12 per case

These traps are designed to be hung in clothing storage areas, and are simple to assemble and installed in seconds. Male clothes moths are attracted to the trap by pheromones contained in a slow-release strip, then caught on the glue inside the trap. Consequently, infestation is reduced as females do not mate.

- The attractant lasts around 6 weeks from activation.
- Easy to use.
- No chemicals.

④ Fly Papers PSFP

Contains 4 individual papers, 24 packs in a display tray

A traditional method of trapping flies in the home. These sticky paper strips are hung from the ceiling and trap flies on contact.

- Simply untwist and hang up for immediate use.
- Drawing pin and hanging loop provided.
- Simply dispose of in the bin when full – each tube can catch up to 100 flies.

Insect Pest Control

High-tech electronic and traditional insect killers and traps.

5

6

5 Fly Swats PSFS

Contains 36 individual swats

This high-quality plastic swatter has a long handle for extra-reach, and is of a single-piece moulding so that it lasts longer. But there's more to this product than meets the eye!

- Longer reach.
- Tweezers included in the handle, for easy disposal of dead flies/wasps etc.
- A series of spikes along the top of the swat are designed for 'finishing-off' stunned insects.
- Supplied in red and yellow.
- Large head for extra effectiveness.

Procter Pest-Stop Display Stands

www.pest-stop.co.uk

0.6m Display

1.0m Display

These superb modular display stands give complete flexibility to allow for any combination of the Procter Pest-Stop range. The basic stands come in either 0.6m or 1m modules, which allows for single or multiple units together and any combination of shelf or pegboard layouts. We have special versions for Garden Centres and Agricultural Merchants which have a specific and targeted range of products. Just contact us to discuss your requirements.

These free standing display units are new for 2011 and ideal for garden centres, as the two products are the Outdoor Pest Repeller and Ultrasonic Cat Scarer.
